Producer: When Jochen Dreissigacker was given the opportunity to take over his parents' estate and to design the winegrowing according to his own ideas, he made a decision: good should become outstanding, tasty should become exciting and pleasing should become strong in character. Since then, ecology, sustainability and the careful use of natural resources have gradually become the face of the vineyards. The reward are exciting, sometimes even edgy wines of outstanding quality.

Soil & Climate: Limestone, loess, clay, marl. Cool climate.

Vintage: Until the harvest partly very different conditions. Not all locations were equally affected by the summer drought. However, almost everywhere there were first-class ripened grapes with high must weights. September turned out to be an almost perfect harvest month: during the day usually pleasant warmth, at night it cooled down, so that the grapes remained largely healthy and were able to develop intensive aromas.

Vinification: Organically produced wine.

Grapes are harvested by hand late and highly ripe, maceration up to 48 h, spontaneous fermentation, maturation on the yeast for 12 months in 1200L barrels (40%) and stainless steel tanks (60%) and for 3 more years after bottling.
